

I claim:

1. An article of jewelry for remembering an hour for an event, comprising:
a set of primary links each of which is provided with an hour of the day indicating means,

and at least one visual reminder means comprising a selectively viewable mechanism associated with each of said primary links to indicate which of the primary links corresponds to an event to be remembered.
2. An article of jewelry as claimed in claim 1 wherein said primary links form a bracelet.
3. An article of jewelry as claimed in claim 1 further comprising a set of connecting links, said connecting links being spaced between said primary links and together forming a bracelet.
4. An article of jewelry as claimed in claim 3 wherein said connecting links are provided with visual indicating means for providing a second visual indication of the hour of the day associated with said reminder means.
5. An article of jewelry as claimed in claim 1 wherein said hour of the day indicating means is selected from the group comprising Roman numerals, Arabic numbers, an analog clock face; braille markings and a column of stones.

6. An article of jewelry as claimed in claim 4 wherein said visual indicating means for providing a second visual indication of the hour of the day associated with said reminder means is selected from the group comprising Roman numerals, Arabic numbers, an analog clock face; braille markings and a column of stones.

7. An article of jewelry as claimed in claim 4 wherein said set of primary links are provided with Roman numerals and said set of connecting links are provided with an analog watch face and a marking stone.

8. An article of jewelry as claimed in claim 1 wherein said reminder means comprises a knob with at least two viewable and different faces, rotatable with respect to said primary link and selectively displaying one of said viewable and different faces.

9. An article of jewelry as claimed in claim 8 wherein said knob comprises four faces, each face having a colored stone thereon.

10. An article of jewelry as claimed in claim 1 wherein said primary links are analog representations of a watch face with a stone marker for the hour of the day and said reminder means is a rotatable knob with at least two viewable and different faces rotatable with respect to said primary link and displaying one of said viewable faces.

11. An article of jewelry comprising a set of primary links each having a visual indication of an hour of the day for an event to be remembered; and a reminder means associated with each of said primary links, comprising a rotatable knob mechanically connected to said primary link, said knob having at least two visually distinct faces for selective manipulation of a face into a viewable position.

12. An article of jewelry as claimed in claim 11 wherein said knob has four faces each of which is provided with a gem.

13. An article of jewelry as claimed in claim 11 wherein said knobs are on the end of a rotatable axle passing through said primary links, said axles having a knob on each end thereof, and said knobs having different visual indicators from one another.

14. An article of jewelry as claimed in claim 11 further comprising connecting links interconnected between said primary links to form a bracelet.

15. An article of jewelry as claimed in claim 14, wherein said connecting links are provided with a separate visual indicating means indicative of the hour of the day of one of said primary links to which said connecting link is secured.

16. An article of jewelry as claimed in claim 11 wherein said visual indication of an hour of the day for an event to be remembered is selected from the group comprising Roman numerals, Arabic numbers, analog clock face; braille marking and a column of stones.

17. An article of jewelry as claimed in claim 15 wherein said separate visual indicating means of said connecting links and indicative of the hour of the day for an event to be remembered is selected from the group comprising Roman numerals, Arabic numbers, analog clock face; braille markings and a column of stones.

18. An article of jewelry as claimed in claim 1 further comprising a biasing mechanism for ensuring that said reminder means is maintained in place until manually moved to a new orientation.

19. An article of jewelry as claimed in claim 11 further comprising a biasing mechanism for ensuring that said reminder means is maintained in place until manually moved to a new orientation.

20. An article of jewelry as claimed in claim 18 wherein said biasing mechanism is a resilient spring which mechanically cooperates with said reminder means.

21. An article of jewelry as claimed in claim 20 wherein said reminder means comprises a knob at the end of an axle of square cross-section and said resilient spring bears against the flat surfaces of said axle to hold said reminder means in relative position unless manually moved to a new orientation.

22. An item of jewelry as in Claim 1, wherein a shutter and a window is provided for said primary link, said shutter covering said window and said visual indicating means unless said shutter is opened.

23. A bracelet for indicating an event to be remembered at an hour of the day, comprising:
a series of primary links connected to form a bracelet,
wherein each link comprises an analog watch face design and a marker stone to indicate the hour of the day for said primary link such that a primary link with a stone marker is provided for each hour for which an event may occur in a day and each link further comprising:
a rotatable rosette having two or more different stones, such that only one stone, at any one time is viewable.

24 ~~23~~. A bracelet as claimed in claim 22 wherein said links are hingedly connected together.

25 ~~24~~. A bracelet as claimed in claim 22 wherein said primary links are further provided with Roman numerals to indicate the hour for which an event may occur in a day.

26 ~~25~~. A bracelet as claimed in claim 23 wherein said rotatable rosette has four stones.

27 ~~26~~. A bracelet as claimed in claim 23 wherein said rosettes are held in place by a resilient spring leaf.

28 ~~27~~. A bracelet as claimed in claim 23 wherein said analog watch face design and marker stones are comprised of diamonds and a different colored gem.

29 ~~28~~. A bracelet as claimed in claim 23 wherein the primary links are made from precious metal.

30 ~~29~~. An article of jewelry as claimed in claim 1 wherein said primary links are made from precious metal.

31 ~~30~~. An article of jewelry as claimed in claim 11 wherein said primary links are made from precious metal.

32 ~~31~~. An article of costume jewelry as claimed in claim 23.

33 ~~32~~. An article of costume jewelry as claimed in claim 1.

34 ~~33~~. An article of costume jewelry as claimed in claim 11.

35 ~~34~~. An article of jewelry as claimed in claim 1 wherein said visual reminder means comprises an on-off pushbutton mechanism.

36 35. An article of jewelry comprising:

an analog watch-like face with an hour of the day marking means;

radial grooves extending from the center of said face to the locations

corresponding to the hours of said watch-like face; and

an event reminder marker means mechanically connected to said face and capable of being selectively radially moved from said center of said face to a location proximal to the hour of the day for an event to be remembered.

37 36. An article of jewelry as claimed in claim 35 wherein said hour of the day marking means comprises at least one gem located at the 12:00 position.

38 37. An article of jewelry as claimed in claim 36 wherein said gem is a diamond.

39 38. An article of jewelry as claimed in claim 35 wherein said event reminder marker means comprises a ring groove holding two or more gems slidably around said ring groove and into said selected radial groove corresponding to the hour of the day of the event to be remembered.

40 39. An article of jewelry as claimed in claim 35 wherein said event reminder marker means comprises a precious gem selected from the group comprising: a diamond; a sapphire; a ruby; and an emerald.
